

Assignment 4.3

Pradyot Prakash - 130050008

Utkarsh Mall - 130050037

Samarth Mishra - 130260018

March 25, 2017

(a)

Using Modified Levenberg Marquardt Algorithm with $\lambda = 0.1$.

Optimal D

$$\begin{bmatrix} 6.3149 + 0.0000i & -3.8021 + 0.1439i \\ -3.8021 - 0.1439i & 13.4367 + 0.0000i \end{bmatrix}$$

(b)

Principal Direction Principal direction found out using eigen decomposition is:

$$\begin{bmatrix} 0.3979 - 0.0000i & -0.9168 + 0.0347i \end{bmatrix}$$

(c)

Diffusion Ratio Diffusion in the principal direction as compared to the diffusion in the direction orthogonal to it is:

$$3.2343$$

Found using ratios of diagonal elements
